CORAL IPX OFFICE

 Radian Telecom

CORAL IPX OFFICE

The Coral IPx Office is designed to provide voice and data communications in a single box. No more finger pointing. You'll have a single point of contact for support. You'll have peace of mind that your system components are designed to connect your people and to keep your data flowing. Use as a standalone or place one at each location for a network of Coral IPx systems providing seamless continuity in a multi-site organization. But make no mistake; this compact server has the same features as the enterprise-sized Coral IPx that large organizations enjoy.

All the call processing power of a PBX but designed for VoIP. The Coral IPx Office can accommodate SIP trunks, SIP phones, soft phones, Wi-Fi wireless devices and Tadiran's FlexSet-IP full-feature telephones. Just as easily it can accommodate traditional interfaces like PRI, T1 and analog.

The compact Coral IPx Office allows you to take advantage of IP telephony without sacrificing the hundreds of leading-edge features you need, such as mobility, "hot desking," ACD, contact center capabilities, integrated unified messaging and it even includes your own conference-bridge facilities.

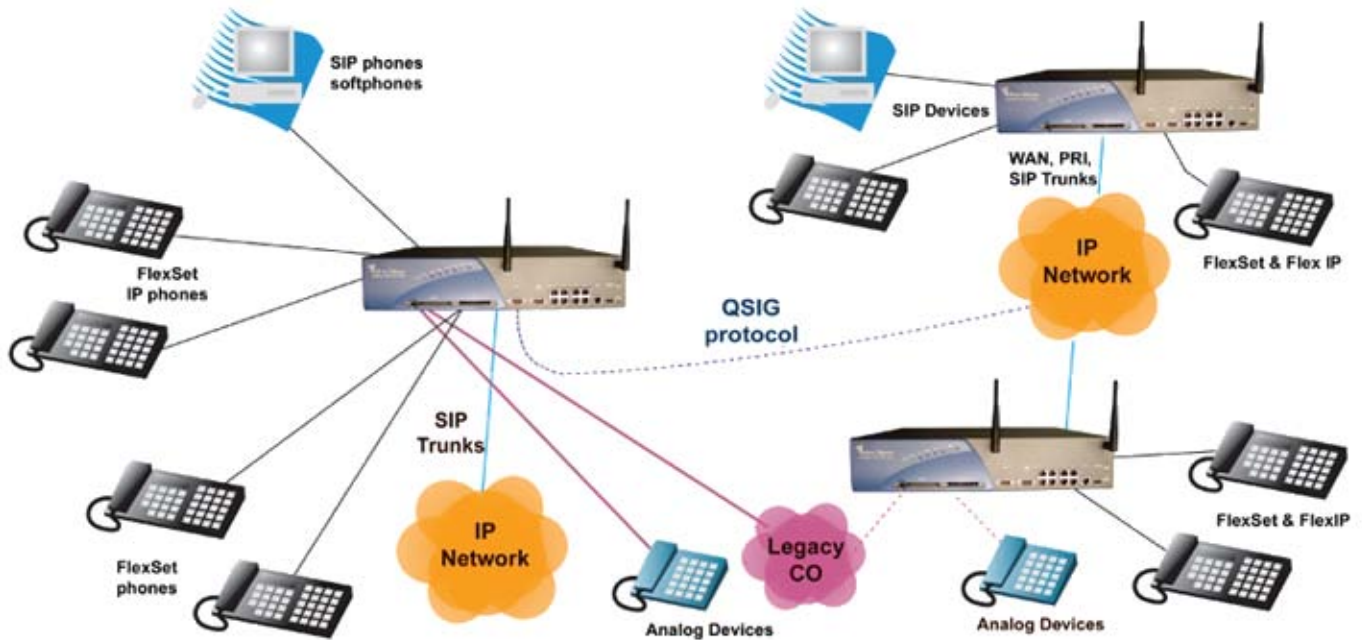

Take the guesswork out of choosing voice components and data components that work well together. The Coral IPx Office is designed to provide both voice and data all day, everyday.

Cell Phone Integration - The Coral IPx Office supports Flexicall and Freedom which bring in-office features to your cell phone.

CORAL IPxOFFICE

ALL-IN-ONE COMMUNICATIONS

BUSINESS BENEFITS

- Integrated, compact package provides both voice and data capabilities. This simplifies the buying process and provides a single point of contact for support.
- VoIP provides the flexibility for management to have a phone at home, or for remote employees to have the same phone features as those in the office.
- VoIP provides low-cost connectivity between locations of multi-site organizations.
- The powerful Coral IPx features are common on Coral IPx Office and larger Coral IPx systems.
- Standards-based design allows users to choose third-party devices such as video phones, SIP phones, and soft clients.
- Expandable with IP and other telephony interfaces. Adding another IP phone requires no new dedicated hardware ports.*
- Flexible hardware design allows you to make decisions later rather than sooner. The Coral IPx has a variety of cards available to support all the common analog and digital trunks and extensions.

APPLICATIONS

- Small or Medium sized business with a single location and 150 or less users, using primarily VoIP devices.
- Multiple sites that prefer to have a standardized voice and data solution at each site providing commonality of use and administration.
- Cost-effective branch office location of a larger organization that needs features and networking and a few local telephone lines.
- Diverse organization that needs a flexible solution and a growth path for expansion.
- Small office using digital telephones with growth plans utilizing VoIP.

License fees may apply.

The IPx Office supports a Windows-based soft-phone which turns any laptop or PC into a full-featured IP telephone.
